Elica connect – ENGLISH VERSION

Elica Connect

The hood features a WiFi function for remote connection via the Elica Connect app.

Minimum system requirements:

- 2.4GHz WiFi b/g/n wireless router
- Android or iOS Smartphone. Via the stores, check that the app is compatible with the operating system your Smartphone is running.

Note: The ELICA manufacturer declares that this model of household appliance with WiFi module radio equipment complies with Directive 2014/53/EU.

The radio equipment operates within the 2.4GHz ISM frequency band, the maximum radio frequency power transmitted does not exceed 20 dBm (e.i.r.p.).

T1. WiFi button

- **WiFi configuration:** if the WiFi function is not configured, press for about 2 seconds to enter WiFi configuration mode and follow the instructions on the App to complete the procedure.

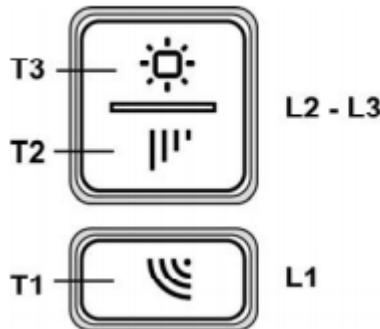

During the configuration procedure, the button will light up indicating the connectivity status (see WiFi status table)

To interrupt the WiFi configuration procedure, press for about 2 seconds when the button is lit up and is flashing fast.

Once the WiFi function has been configured, if you want to change it, press for about 6 seconds to reset the WiFi parameters (the button will turn off) and repeat the configuration procedure.

- **WiFi activation/deactivation:** after the configuration, it is possible to deactivate/activate the WiFi function. Press for about 2 seconds to deactivate/activate the WiFi function. Deactivating the function does not cause the loss of the WiFi parameters.

Funzionamento

Suction speed (power) control button: 1, 2, 3, intensive
Note: Intensive speed lasts for about 5 minutes, then it automatically set to speed 3.

ON/OFF button (short press) and light intensity adjustment (long press).

Light colour temperature adjustment:

In the light ON, press and hold T1 + T3 to change the light colour temperature.

WiFi status table

WiFi button	Device connection status
Light off	WiFi not configured or off
White light on steady	WiFi connected
Orange light flashing fast	Attempt to connect to the WiFi router
Orange light flashing slowly	Attempt to connect to the Elica cloud
White light on with short flashing orange light	Remote command being received (e.g. engine ignition or light turned on)

SERVICE MANUAL HIDDEN 2.0@

Elica connect – VERSIONE ITALIANO

Elica Connect

La cappa è dotata di funzionalità WiFi per la connessione remota tramite l'app Elica Connect.

Requisiti minimi di sistema:

- Router wireless 2.4GHz WiFi b/g/n
- Smartphone Android o iOs. Verificare sugli store la compatibilità dell'app con la versione del sistema operativo del proprio smartphone.

Nota: Il fabbricante ELICA dichiara che questo modello di elettrodomestico con apparecchiatura radio modulo WiFi è conforme alla direttiva 2014/53/UE.

L'apparecchiatura radio opera nella banda di frequenza ISM a 2.4GHz, la massima potenza a radiofrequenza trasmessa non eccede 20 dBm (e.i.r.p.).

T1. Tasto WiFi

• **Configurazione WiFi:** se la funzionalità WiFi non è configurata, premere per circa 2 secondi per entrare in modalità configurazione WiFi e seguire le istruzioni sulla App per completare la procedura.

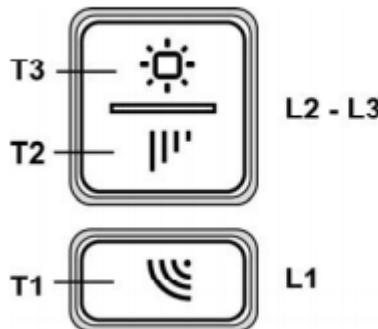

Durante la procedura di configurazione il tasto si illumina indicando lo stato della connettività (vedi Tabella stato WiFi)

Per interrompere la procedura di configurazione WiFi, premere per circa 2 secondi quando il tasto è acceso a luce pulsante veloce.

Una volta configurata la funzionalità WiFi, se si desidera modificarla premere per circa 6 secondi per resettare i parametri WiFi (il tasto si spegne) e ripetere la procedura di configurazione.

• **Attivazione/disattivazione WiFi:** dopo aver effettuato la configurazione, è possibile disattivare/attivare la funzionalità WiFi. Premere per circa 2 secondi per disattivare/attivare la funzionalità WiFi. La disattivazione della funzionalità non comporta la perdita dei parametri WiFi.

Funzionamento

T2. Tasto di controllo velocità (potenza) di aspirazione: 1, 2,

3, intensiva

Nota: La velocità intensiva ha una durata di circa 5 minuti, dopodiché viene impostata automaticamente la velocità 3.

T3. Tasto ON/OFF (pressione breve) e regolazione intensità luce (pressione lunga).

Regolazione temperatura colore luce:

Con luce ON premendo a lungo T1 + T3 è possibile cambiare la temperatura colore della luce.

Tabella stato WiFi

Tasto WiFi	Stato connessione dispositivo
Luce spenta	WiFi non configurato o spento
Luce accesa fissa bianca	WiFi connesso
Luce pulsante veloce arancio	Tentativo di connessione al router WiFi
Luce pulsante lento arancio	Tentativo di connessione al cloud Elica
Luce accesa bianca con breve luce pulsante	Ricezione di un comando da remoto (es. accensione motore o luce)

Thank you
